

Week Report

Project	Real-Time Bridge Monitoring	Week	51
Name	Andrea Bottoli	Date	22.12.2013

Achievements

- Fixed bugs in the calculation controller
- Fixed bugs in the scheduler
- Fixed bugs in the dao for the updating of the worst case tables
- Run the system & start filling the remote DB
- Customer meeting
- Supervisors meeting
- Finalized Beta Prototype
- Managed tasks & issues
- Added Apache License 2.0 to our product in class headers, with readme file & license file

Problems

- Found some bugs difficult to see in dao, scheduler & controller
- Difficulties in filling remote DB cause the VM are slow and the calculation are a lot
- Too few hours slept

Plans for the next week

- Continue working on fixing bugs
- Continue filling the remote DB
- Manage the group with tasks, issues and meeting(s)
- Take suggestions & opinions from customers
- Fix the web pages
- Continue working on final documentation
- Try to finalize Design & Requirements documents
- Some more relax during Christmas week :-)
