

# Week Report

<b>Project</b>	<b>Real-time Bridge Monitoring</b>	<b>Week</b>	45
<b>Name</b>	Marko Brčić	<b>Date</b>	10.11.13

## Achievements

- Finished the class diagram and website organization diagram
- Finished some parts of the Design documentation
- Finished the database design with Jörn
- Added few slides to Status report presentation
- Presented the status report
- Reorganized the Git repository
- Created the Java Web project in the Git repository
- Changed the team policy documents
- Started transferring the tasks to GitHub issues
- Assigned few tasks to team members
- 

## Problems

- Setting up the development environment and configuring the VM
- Communication with other team members working on the design document
-

### Plans for the next week

- **Start the implementation**
- **Change the documentation where needed**
- **Resolve misunderstandings and ambiguities with the requirements**
