

1. **Web Site**
 1. The customer viewed the web site → he liked that
2. **Design Document**
 1. We promised to deliver him our Design Document before next meeting (next Tuesday)
3. **Requirements gathering**
 1. We remember him to give us the last formulas → he promised to send them to me and Lorenzo before 24/11/2013
4. **Calculations**
 1. We asked him some information about calculation
 2. During next meeting we'll try to validate our code (formulas side) using real values, so we need DAO to access the DB :-)
5. **View**
 1. He asked to see also the Q,S,V, P (and so on) values (if possible)...btw we can discuss about it (but I think it takes not a lot of effort) → if we'll decide to show also that values I think we'll need another table on the DB (but we – me and Lorenzo – are still thinking on it)
6. **Next presentation → alpha prototype**
 1. We asked him if he'll be present, but he replied that he'll be on the bridge on thursday so he asked us to show him presentation and prototype next meeting (Tuesday)
