

1. **Project Status**
 1. Alpha Prototype
 1. DB
 2. Parser
 3. Some Graph to show
 2. Beta Prototype
 1. Math Engine
 2. Finalize Parser
 3. Web content, graphs,...
 3. Final
2. **Presentation Alpha Prototype**: the presentation should contains
 1. What was our goal?
 2. What have we done?
 3. What are the results?
 4. The effort (more or less :-)
 5. Some screenshots
 6. A demo → Eclipse/local and remote site
3. **Status Report (05/12/2013)**
 1. Some graphs from github (commits, code frequency, etc)
 2. Project Plan
 3. Update documents
 4. Show requirements and some design changes
 5. what else? :-)
4. They tell me to **congrats** with the whole group because we are working hard and we are doing a great work in their opinion
5. **Final Product**
 1. Single file auto-installable, with DB, Tomcat, JRE, etc → they don't know, they have to ask to someone
 2. My proposal is:
 1. **Linux version** → bash script (setup.sh) in an archive that contains all the things needed (included our product) that installs all the system
 2. **Windows version** → bat script (setup.bat) or an exe (setup.exe) in an archive that contains all the things needed
 3. We have to think about this.ò..have you some proposals/suggestions?
6. They ask me to **provide them the presentation for the alpha prototype untill Tuesday morning**, then I'll meet them on Wednesday → Dzana and Nikola, could you do that? Do you need more time?
7. More or less, that's all :-) **Good job guys!! :-)**
