

# Week Report

<b>Project</b>	<b>Real-time Bridge Monitoring</b>	<b>Week</b>	44
<b>Name</b>	Marko Brčić	<b>Date</b>	3.11.13

## Achievements

- Received one more team member
- Agreed on the roles
- Finished first version of the project plan
- Started working on requirements and design

## Problems

- Setting the VM for future use
- Making the team policy rules as stricter as possible
- Hard to communicate with customer
- Current VM storage is not big enough

### Plans for the next week

- **Finish setting the VM**
- **Help all the team members who didn't set up the environment**
- **Work intensively on documentation, requirements and design**
- **Start making the database and testing the input data fetching and storing to database**
- **Rearrange the repository on Github**
- **Change policy rules**
