#### The Development Group

# Real-Time Bridge Monitoring Status Report

#### Overview

- Team Organization
  - The Development Group
  - Updated Roles
- Project Status
  - Actual Project Plan
  - Actual Architecture
  - Some API Diagrams
  - Some Sequence Diagrams

#### Overview

- Meetings
  - Group meetings
  - Customer meetings
  - Supervisor meetings

#### Team Organization

#### The Development Group

Andrea Bottoli (PoliMi)

Lorenzo Pagliari (PoliMi) Marko Brčić (FER)

Ghazal Shojaee (PoliMi)

Dzana Kujan (MDH) Jörn Tillmanns (MDH)

Miraldi Fifo (MDH)

Nikola Radisavljevic (MDH)

# Team Organization

#### Updated Roles

Name	Initials	Responsibility (roles)
Andrea Bottoli	AB	<b>Project Manager</b>
Dzana Kujan	DK	Team Leader
Marco Brčić	MB	Documentation Manager
Lorenzo Pagliari	LP	Design Manager
Miraldi Fifo	MF	Testing Manager
Jörn Tillmanns	JT	Database Manager
Nikola Radisavljevic	NR	Integration Manager
Ghazal Shojaee	GS	Design Manager

- Actual Project Plan (I)
  - Where we are

Aufgabenname		(	okt 2	0				Okt 2	27			Nov	Nov 3 Nov 10 Nov 1										17

Requirements Analysis																										
System Design																										
Programm Design: Alpha_Prototype																								199		
Implementation: Alpha_Prototype																										4
Testing: Alpha_Prototype																										
Programm Design: Beta_Prototype																										
Implementation: Beta_Prototype																										
Testing: Beta_Prototype																	95 99									
Programm Design: Final_Version																										
Implementation: Final_Version																										
Testing: Final_Version																										

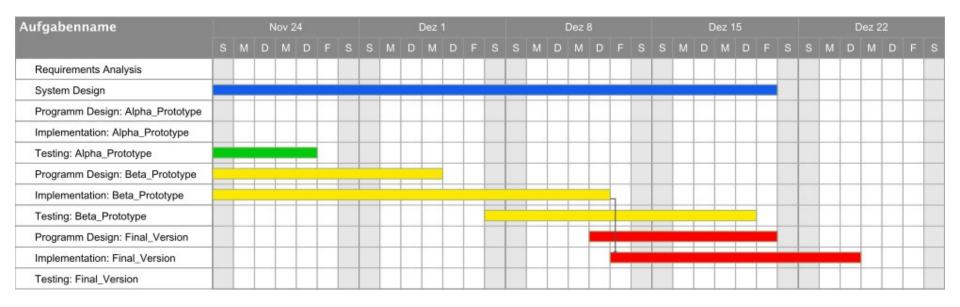

- Actual Project Plan (I)
  - What we have still to do

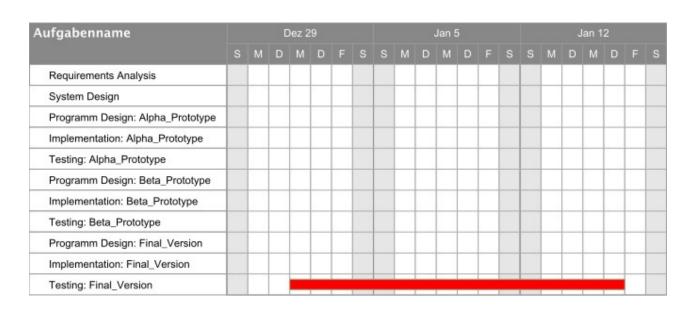

- Actual Project Plan (I)
  - What we have still to do

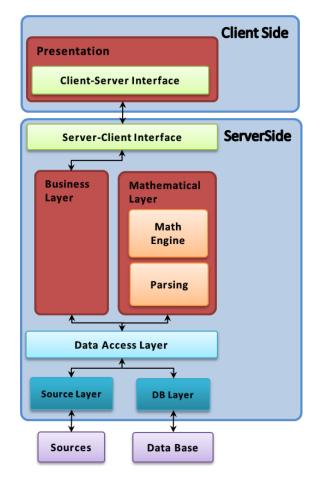

- Actual Project Plan (II)
  - Modules distribution (persons in charge)
    - Data Access Layer is divided in:
      - DB Layer and Source Layer
    - Math layer is divided in:
      - Parser and Math Engine
    - DB Layer, Source Layer and Parser:
      - Jörn Tillmanns and Marko Brčić
    - Math Engine and Business Layer
      - Andrea Bottoli, Lorenzo Pagliari and Ghazal Shojaee
    - Presentation Layer
      - Dzana Kujan, Miraldi Fifo, Nikola Radisavljevic

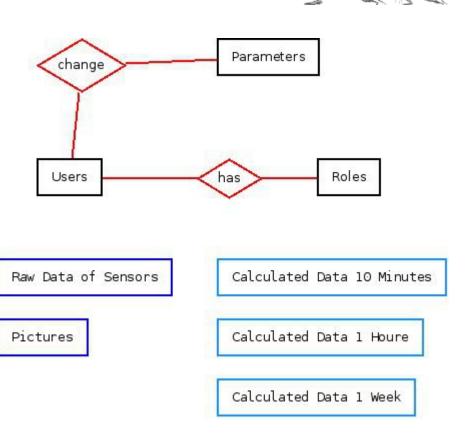

Actual Architecture

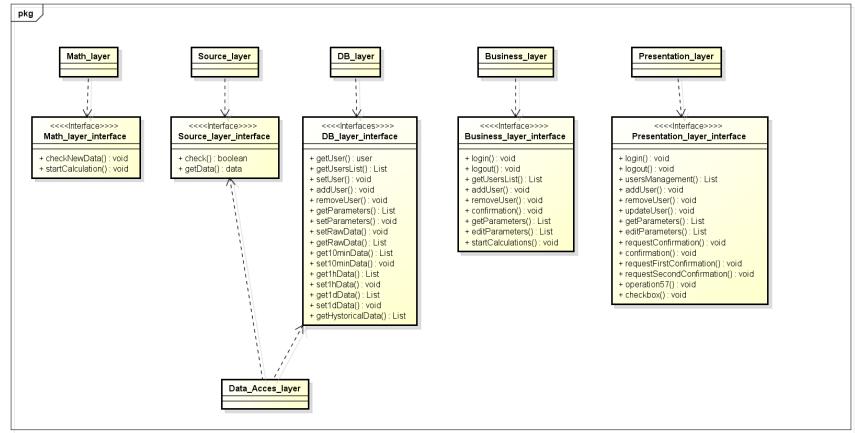

Some API Diagrams

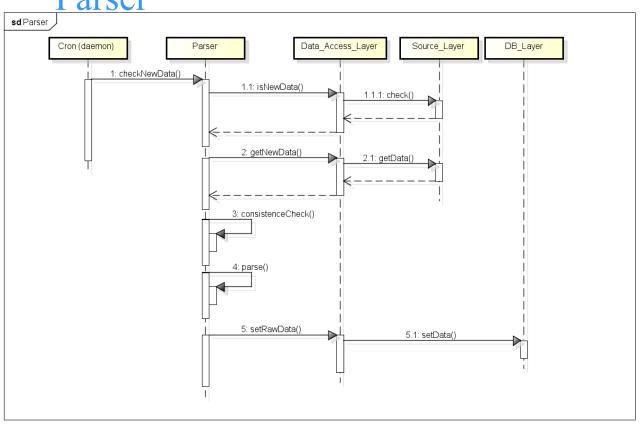

• Some Sequence Diagrams (I)

Parser

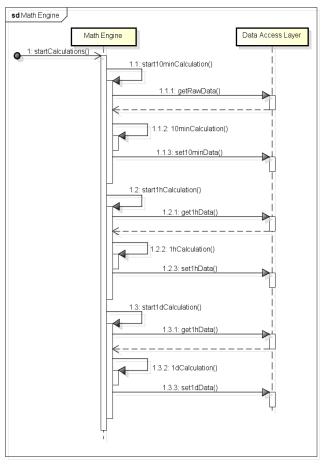

- Some Sequence Diagrams (II)
  - Math Engine

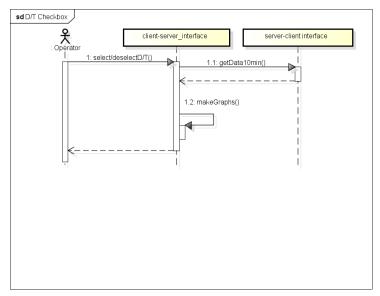

- Some Sequence Diagrams (III)
  - Change Parameters: operator

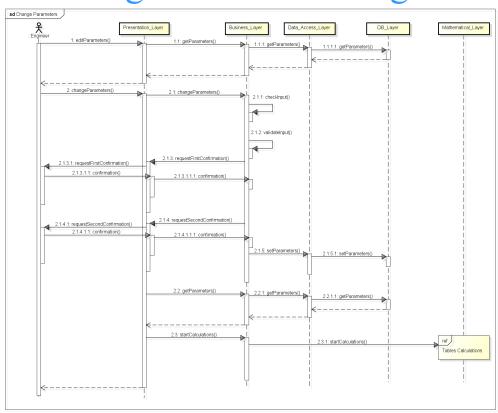

powered by Astah

- Some Sequence Diagrams (IV)
  - Change Parameters: engineer

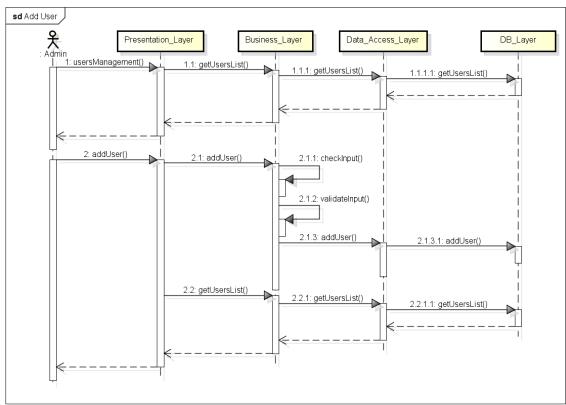

- Some Sequence Diagrams (V)
  - User managing: add user

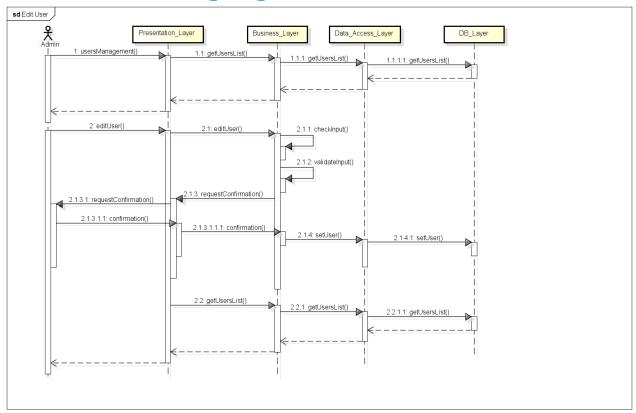

- Some Sequence Diagrams (VI)
  - User managing: edit user

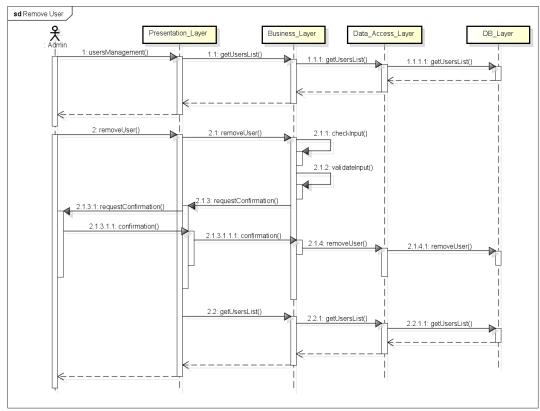

- Some Sequence Diagrams (VII)
  - User managing: remove user

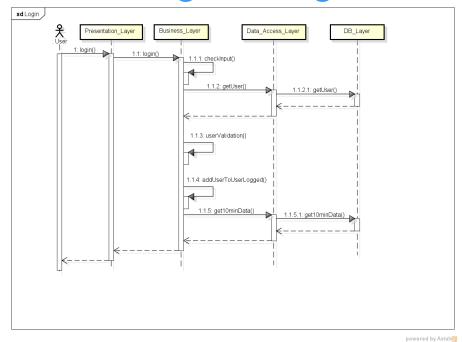

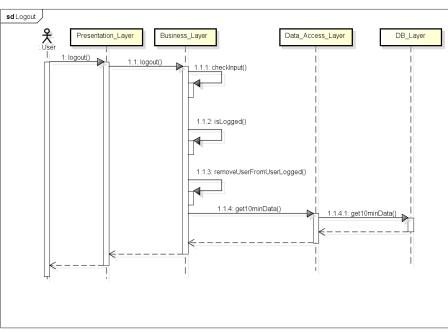

- Some Sequence Diagrams (VIII)
  - Login & Logout

powered by Astah

#### Meetings

- Both chat & video
- Group Meetings
  - Face to face meetings
  - Formally scheduled every Tuesday 7 P.M.
  - Actually, about 3 or 4 every week ;-)
  - 9 Minutes of Meetings
- Project Leader & Team Leader Meetings
  - About every day (during the week)

### Meetings

- Customers Meetings
  - One every week
    - Project status
    - Customers desires
    - Requirements
  - First one with both customers
  - The others with ing. Crotti

#### Meetings

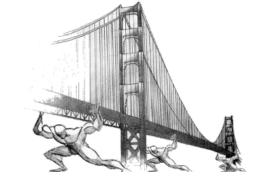

- Supervisors Meetings
  - One every week
  - Inform about
    - Project status
    - Group status & managing
    - Report about customer meetings
  - Gather advices
  - Report problems
    - until now, not needed --> no problems ;-)

# **Question Time**

#### Thank You

• Thank you for your attention :-)
