Week Report

Project	**Real-Time Bridge Monitoring**	**Week**	47
Name	Dzana Kujan	**Date**	25.11.2013

Achievements

-**Succeed connecting the presentation with business layer and database by presenting raw data wind speed graph on the webpage**
-**Designed the webpage (poor design, needs more work)**
-**Presentation of anemometer, hydrometer, sonar graphs and current values, pictures of bridge on the 'Current Value' page.**

Problems

-**Problems with sending data from server to client (javascript), solved by using JSON.**
-**We are not experienced with design**

Plans for the next week
-Finish the design of the webpage **-Make the presentation of the alpha prototype** **-Update the requirements document** **-Finish Current State page**
